1. Requirements Spec.: SRS-K-CRS : UC-S3-001 Create Course with Default Resources

revision	1
Author	admin
Type	User Requirement Specification
Total count of requirements (Coverage)	N/A (6/0)

An approved student creates a course (title, description, colour); the system creates four default resource cards. Source: UniShare_Iteration_3.md Use Case 1 (UC-S3-001) and Sequence 1; src/server/api/routers/course.ts (create); src/components/courses/course-form.tsx; src/app/(student)/courses/new/page.tsx; middleware.ts; src/app/(student)/layout.tsx. Differences from the document: code has no course code / semester / icon fields; minimum title length is 1 (document: 2); an invalid colour is rejected, not defaulted; after creation the student is redirected to /courses (document: /courses/<id>).

Requirement: REQ-CRS-01 : Course title validation

Version :	1
revision:	1
Author:	admin
Status	Valid
Type	Use Case
Coverage	100% (1/1)

Title is mandatory, 1 to 100 characters (input has maxLength 100; API z.string().min(1,'Title is required').max(100)). The form trims the title; an empty or whitespace-only title is not submitted and shows the message 'Please enter a course title'.

Related Test Cases	US-42 : Create a course with title, description and colour (main flow) [Version :1]US-43 : Title length boundaries (0, 1, 100, 101 characters) [Version :1]US-44 : Whitespace-only and padded title [Version :1]

Requirement: REQ-CRS-02 : Course description validation

Version :	1
revision:	1
Author:	admin
Status	Valid
Type	Use Case
Coverage	100% (1/1)

Description is optional, maximum 500 characters (textarea maxLength 500, API max(500)). An empty description is stored as no description.

Related Test Cases	US-42 : Create a course with title, description and colour (main flow) [Version :1]US-45 : Description length boundaries (empty, 500, 501 characters) [Version :1]

Requirement: REQ-CRS-03 : Course colour

Version :	1
revision:	1
Author:	admin
Status	Valid
Type	Use Case
Coverage	100% (1/1)

Colour is mandatory and chosen from 8 swatches (Purple, Blue, Green, Orange, Red, Pink, Teal, Indigo); the first (Purple #a855f7) is preselected. The API accepts only '#' followed by exactly 6 hex digits (case-insensitive) and otherwise returns 'Invalid color format'.

Related Test Cases	US-42 : Create a course with title, description and colour (main flow) [Version :1]US-46 : Colour selection - each swatch [Version :1]US-47 : Colour format validation in the API [Version :1]

Custom resource cards, deadlines and file attachments inside a course. Source: UniShare_Iteration_3.md Use Case 1 step 26 + Data Dictionary (ResourceCard, Resource); src/server/api/routers/resource.ts; src/components/resources/resource-form.tsx, resource-card.tsx, file-upload-modal.tsx; src/app/api/uploadthing/core.ts (courseResourceUploader); src/app/(student)/courses/[id]/page.tsx.

Requirement: REQ-RES-01 : Create custom resource card	
Version :	1
revision:	1
Author:	admin
Status	Valid
Type	Use Case
Coverage	100% (1/1)
'Add Custom Resource' opens 'Create Custom Resource'. Title is mandatory 1-100 characters (empty shows 'Please enter a title'), description optional max 500, 'Allow File Uploads' toggle (default ON), optional deadline ('Set a Deadline'). The card is stored with type CUSTOM and 'Resource created successfully!' is shown.	
Related Test Cases	US-60 : Owner creates a custom resource card [Version :1]US-61 : Resource title and description boundaries [Version :1]US-62 : Deadline states: future, within 3 days, overdue [Version :1]

Requirement: REQ-RES-02 : Who may create or update resources	
Version :	1
revision:	1
Author:	admin
Status	Valid
Type	Use Case
Coverage	100% (1/1)
Only the course owner and ACCEPTED CONTRIBUTORs can create/update resources and see 'Add Custom Resource'. VIEWERs and outsiders get 'Only course owner and contributors can create resources' / 'Only course owner and contributors can update resources'; unknown course/resource gives 'Course not found' / 'Resource not found'.	
Related Test Cases	US-60 : Owner creates a custom resource card [Version :1]US-63 : Create/update permission matrix [Version :1]

1. Requirements Spec.: SRS-K-TT : UC-S4-005 Weekly Timetable with Events

revision	1
Author	admin
Type	User Requirement Specification
Total count of requirements (Coverage)	N/A (14/0)

Student creates timetables, adds weekly class events for favourite courses, detects conflicts, shares the timetable and receives class reminders. Source: UniShare_Iteration_4.md Use Case 5 (UC-S4-005); src/server/api/routers/timetable.ts; src/components/timetable/*; src/app/(student)/timetable/page.tsx; src/app/api/cron/class-reminders/route.ts. Differences from the document: events are weekly recurring by day-of-week (no recurrence rule JSON, end date or multiple days per event); the conflict message is 'Time conflict detected / Overlaps with <title> (start - end)'; reminders use the user's reminder timing (5-30 min, default 10) not a fixed 1 hour; the check 'start before end' and the conflict check are done only in the browser, not in the API.

Requirement: REQ-TT-01 : Create timetable	
Version :	1
revision:	1
Author:	admin
Status	Valid
Type	Use Case
Coverage	100% (1/1)
'Create Timetable' (or 'Create Your First Timetable' when the student has none: 'No Timetables Yet') needs a Name of 1-100 characters (API message 'Name is required') and an optional Description of max 500. The new timetable is listed under 'My Timetables' and the creator is the owner.
